

Workshop

Democratising Microscopy in Latin America: Imaging Across Scales and Regions

Funded places for early-career researchers

Through this Workshop we aim to enable early-career researchers from the Global South to network with scientists from around the globe and across multiple fields of science and to exchange ideas on microscopy technology and applications, become familiar with open hardware and software projects that can be adapted, to discuss approaches for future microscopy-based research and to foster collaborations.

Topics for discussion include:

- Microscopy in Latin America, focusing on examples of lightsheet, FLIM, cryo-EM and AFM
- Open Hardware for affordable microscopy

- Open Software for affordable and accessible image analysis
- Outreach, dissemination and open science initiatives in microscopy
- The value of applied microscopy to solve local questions and advance local research. This will include infectious diseases, agriculture, ecology and developmental biology
- The value of microscopy in education
- Opportunities for Global South researchers in microscopy
- Resources and networks to support Global South researchers

Organisers

Constadina Arvanitis
Mario Del Rosario
Helena De la Torre
Mariana De Niz
María Fernanda Latorre Barragán
Licyel Lenny Paulas Condori

Speakers

Federico Brown
Santiago Casado
Teng-Leong Chew
Benedict Diedrich
Estibaliz Gómez-de-Mariscal
Hernán E. Grecco

Adán Guerrero
Ricardo Henriques
Anna Kreshuk
Federico Lecumberry
Lucía López
Kildare Miranda

Iván Rey
Aníbal Vargas Ríos
Andrés Romero-Carvajal
Tobias Wenzel
Flavio Zolessi

Secure your place* alongside leading experts and other early-career researchers from a diverse range of scientific backgrounds.

Deadline: 14 February 2025
